EXPERIENCE

Front end developer (contractor) – AON3D, Montreal, Canada
May 2020 – present

- Working with: JavaScript | Python | HTML | CSS.
- Rebuilt and redesigned responsive UI interfaces for internal web applications.
- Fixed bugs and testing newly added functionality.
- Developed new features and refactored existing ones.

Front End Developer – HabitHop (habit tracker), Montreal, Canada
September 2022 – present
Personal project (part time)

- Built a full stack web app while planning and organizing my relocation to Montreal.
- Defined and developed the UI, tested components, features and bug fixes.
- Improved testing skills and knowledge with online courses and testing my code base.
- Set up Docker for a Node.js server connected to a PostgreSQL database.
- Developed a RESTful API and defined the necessary database models.

Career Break – Amsterdam, Netherlands
March 2020 – August 2022

- Took a personal sabbatical.
- Planned and organized my relocation to Montreal.

Junior Front End Developer – Overstappen.nl, Amsterdam, Netherlands
February 2020 – February 2022

- Developed components, features, tests and bug fixes in our React comparator apps.
- Proactively took on coordination, team process development and scrum responsibilities to help improve our team's delivery time and effectiveness.
- Raised awareness of projects slowing down delivery time and worked on solutions with the team.
- Wrote documentation for running our WordPress websites locally that saved up to 10 hours per newly on-boarded developer.
- Supported colleagues working on our WordPress websites with building new blocks and sprint work coordination.

Junior Full Stack Developer – klikkie, Amsterdam, Netherlands
April 2019 – November 2019

- Successfully moved from Frontend Intern to a Junior Full Stack Developer position.
- Rebuilt 50% of the user profile app (React) while learning several new technologies.
- Developed new features and functionality for the upload-app, admin, website, API.
- Extended features, tested and fixed bugs in five different codebases.
- Reduced mobile app crashes by researching and implementing a testing framework.
- Improved and expanded our documentation, team workflow, sprint planning.
